Disclosure tier legend

Tier	Meaning
T1	NDA technical baseline / architecture / planning (external under NDA)
T2	Detailed design, ICD, models, test data, commercial conditions (NDA + need-to-know)
T3	IP claims, prior-art, negotiation strategy (counsel-controlled)
T4	Production release, quality records, serialised build & field data (post-pilot)

Counts are a controlled planning tree, not proof that all 70 files already exist. Path A licence engagement can open on the module core subset; host packs are built when the buyer selects V-L and/or V-H.
